

Scar & Oedema

CICATREX®

For the treatment of burns, lymphoedema and post operative scarring

The particular quality of Cicatrex® Skin is its very fine, smooth, lightweight knit with the sheen of silk

Burns

Prevention and treatment of hypertrophic scars, keloids and scar retractions
Treatment of thermal, chemical or electrical burns
Compression of skin graft zones

Lymphology

Reduction and stabilisation of lymphoedema

Plastic & Reconstructive Surgery

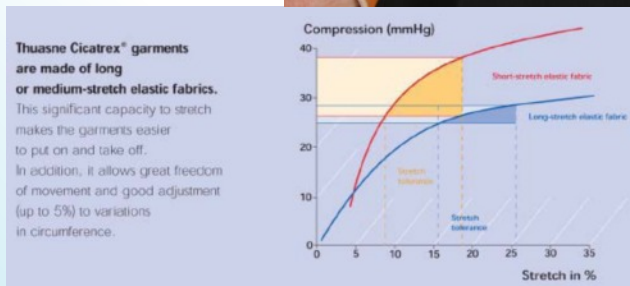

Post-op treatment of traumatic and surgical scars

Patients with second-degree burns or worse are exposed to the risk of hypertrophic scarring, which can degenerate into keloids.

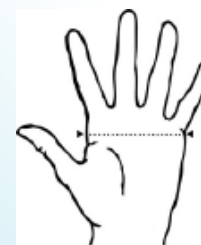

The compression exerted by Thuasne Cicatrex® garments slows down blood irrigation [relative ischaemia], reducing hypervascularisation causing hypertrophy, oedema, pruritis and fibroblasts.

The principle of Cicatrex® compression helps reorganise the collagen fibres in a plane parallel to the skin, preventing anarchic healing of the connective tissue, reducing unsightly scars and dysfunctional adhesions.

Compression Gloves

Size	Black Open Tip	Caramel Closed
13.0 - 14.0 cm	344803S1	344802S1
15.0 - 16.5 cm	344803S2	344802S2
17.0 - 18.5 cm	344803S3	344802S3
19.0 - 20.0 cm	344803S4	344802S4
21.0 - 22.5 cm	344803S5	344802S5
23.0 - 24.5 cm	344803S6	344802S6
25.0 - 26.5 cm	344803S7	344802S7
27.0 - 28.5 cm	344803S8	344802S8
